

Sproutable Teacher Training 2021

Sproutable offers child care and preschool program teacher training. Our trainer is a Washington State STARS approved trainer, and trainings can be designed based on teacher needs and challenges within the classroom. See examples of topic areas below or request your own.

Trainer: Julietta Skoog, Ed.S, MA

Julietta Skoog is a Certified Positive Discipline Trainer. She has an Ed.S Degree in School Psychology and a Masters Degree in School Counseling from Seattle University. She is also the co-founder and early learning expert at Sproutable with over 20 years experience helping families. As a school psychologist and counselor with Seattle Public Schools, she has expertise in assessing children with developmental delays, autism, learning disabilities, anxiety, and behavior disorders, as well as leading small groups and large classroom lessons and meetings based on Positive Discipline and Social Thinking. [Mindfulness](#) is a key foundation in all of her work. She is the proud mother of three daughters.

4 hour training= \$1100 (save 100\$)

6 hour training= \$1650 (save 150\$)

Consulting or teacher observations = \$275 /hr

Examples of Topic Areas

Positive Discipline

[Dr. Jane Nelsen's Positive Discipline](#) parent + teacher education is based on the theories of psychologists Alfred Adler and Rudolf Dreikurs. Positive Discipline helps children feel a sense of significance and belonging through learning important life skills of empowerment, self-reliance and cooperation. Learn how to discipline with firmness and kindness, have fun as a teacher, and set the foundation for important social and life skills.

Empowering vs. enabling

How do we empower our children to be capable, confident, and solve their own (small) problems? Empowering means turning over control to children as soon as possible so they have power over their own lives as well as having faith in them to learn and recover from their mistakes. This can be hard to do with little ones! Through experiential activities, teachers will learn Positive Discipline tools and responses that invite cooperation and teach responsibility, problem-solving and independence, even in the midst of big emotions and power struggles.

Encouragement vs. praise

What motivates young children? We cover Deci and Ryan's self-determination theory, Carol Dweck's growth mindset, and Daniel Pink's research on motivation through activities that explore the ways of facilitating persistence and intrinsic motivation in children. Shift away from making your student do well, toward helping your student want to do their best. Understand key drivers of intrinsic motivation and how to foster them, including creating a democratic classroom and inviting preschoolers to adhere to classroom expectations based on intrinsic motivation.

Peer conflict

What skills do our children need to handle peer conflict? Teachers will learn how to embrace child conflict using specific techniques that teach long-term social emotional skills and solve problems in the moment. Regardless of their age, children have the opportunity to learn tools that decrease conflict and increase confidence and assertiveness. These skills support peer interactions and social skills in the classroom and the home.

Power struggles and transitions

Power struggles can be frustrating. Learn tools to decrease and even avoid daily power struggles through transitions with children by inviting cooperation and creating routines together. Learn how to follow through once routines, limits and agreements have been made through mutually respectful responses.

Solutions vs. consequences

Instead of focusing on consequences, teachers can offer solutions to teach missing skills and avoid the punishment trap. Solutions are related, respectful, reasonable and helpful. Learn how to teach children HOW to take responsibility, make a repair, and learn from mistakes.

Wiring the brain for capability and cooperation: emotional regulation

Learn all about your student's brain development, mirror neurons and why it matters to offer opportunities to strengthen those neural connections. Learn how to teach emotional regulations skills when big emotions and tantrums erupt. Strategies for strengthening executive functioning, focus, memory, impulse control and empathy for all ages will be included. Take home tools you can use today to effectively deal with challenging behaviors.

Mindfulness & self-care

Mindfulness strategies can enhance your ability to implement Positive Discipline tools, connect with your students, and decrease anxiety. Learn how to prevent teacher burnout and find small ways throughout the day to increase presence and patience with your students.
